

# SCHOOL SAFETY UPDATE:

## State of Michigan to Provide Site Assessment Funds

### Funding Overview

Michigan state legislature recently passed funding for Michigan schools to conduct physical Site Assessments to evaluate current safety and security measures, both from a physical and procedural standpoint. SEC is proud to be a company that meets the specific criteria needed to be an approved vendor for this assessment.

## How It Works

### Site Visit

SEC will thoroughly examine the facility, including:

- The surrounding area for hazards that could create security concerns
- Internal and external design features
- Existing technical and physical security measures and gaps in security infrastructure
- Relevant safety and security policies and procedures currently in place
- Testing pertinent emergency equipment such as facility and exterior grounds access control features, as well as cameras and video surveillance systems
- On-site interviews with key staff and leadership

### Comprehensive Report

Following the site assessment, SEC will provide a findings report detailing satisfactory existing security measures and also any identified potential vulnerabilities. The report will also include cost-effective strategies to improve safety and security. This custom report is tailored to each facility and suggests actionable next steps, respective to the organization's means and goals.

### Time Commitment

Depending on the size of the facility, the site assessment takes approximately three to four (3-4) hours per location. During one of those hours, we ask that an individual with extensive knowledge of the facility be available to provide a tour and answer any policy and procedure questions.

### Your SEC Consultant

All site assessments are led by highly skilled safety and security experts. Our team boasts decades of security expertise at the highest level as former U.S. Secret Service Agents and high ranking police officers. Most importantly, our expert instructors are parents, passionate about keeping kids safe.

SEC has a well-established school client base throughout the country. In Michigan, school districts we have partnered with include: Oxford, Northville, Novi, Birmingham, Ann Arbor, Forrest Hills, Rockford, South Redford, Grand Rapids Christian and Rochester.
